

Sorry! THIS VAN IS **LOCKED**

Need to leave your van unattended to make a delivery or parked in a lot with no security staff? No problem. UFO+ will keep your cargo safe at all times.

LOCKED AND SAFE

The stainless-steel casing and the unique and modern

design of this lock, which integrates seamlessly with the bodywork of any vehicle, make UFO+ the definitive anti-theft solution, ideal for keeping cargo in commercial vans safe.

SLAM LOCKED

UFO+ stays attached flush against the door, so you can't forget to use it the way you might with a traditional padlock. With its easy-lock latch, UFO+ locks automatically when closed and can be used on both side and back doors.

This makes it extremely handy for anyone who makes multiple quick stops during the day (e.g. express delivery service). With UFO+ you can stop whenever you need to in total safety.

LOCKED & SECURE WITH UFO+

UFO+, the new add-on lock for commercial vans and light trucks is:

- + highly practical, ideal for anyone looking to be safe at all times.
- + strong, built in ultra-resistant steel;
- + ideal for both side and back doors for all vehicle models;
- + unique and elegant in its design, remaining flush against the door with no way to pry it off.

UFO+ is the new add-on security lock for commercial vans and small trucks. Easy and fast to install (in less than 1 hour), it remains fixed to the door and locks with a click, so there's no way you can forget to lock your vehicle. A single key may be used to unlock all UFO+ locks mounted on a given vehicle, making it an efficient, intelligent system that is already being used by the leading transport companies.

- Locking mechanism protected by stainless-steel, drill-resistant protective casing
- 15-pin, multi-combination, reversible dimple key
- Ultra-resistant stainless-steel outer casing
- Available in sets of two or three with a single key
- Easy to install thanks to its bayonet-mount system, making installation fast and effective
- Assembly kit included
