# THE PERFECT CHOICE TO PROTECT LCVs FROM UNWANTED ACCESS

UFO VAN LOCKS is the ultimate range of security locks for light commercial vehicles, designed by Serrature Meroni.

We have been making locks since 1945 and over 10 years ago we developed the UFO VAN LOCKS, a range of locks designed to automotive standards, that has quickly become the benchmark in the market, with more than 600,000 locks sold all over the world.

Security, quality, ease of use and quick installation are the features that have made the UFO<sup>2</sup>, UFO+, UFO<sup>3</sup>, and the latest UFO Cloud, so successful.

# UFO<sup>2</sup>

UFO<sup>2</sup> is the evolution of the historic Meroni UFO Classic, which 10 years ago revolutionised the world of van security in Italy and Europe.

UFO<sup>2</sup> and UFO Classic have the same dimensions; the UFO<sup>2</sup> remaining fixed to the vehicle bodywork at all times. UFO<sup>2</sup> is a user friendly deadlock, featuring a non key retaining design.

The average installation time for the new UFO<sup>2</sup> is only **25 minutes**.

A quick solution providing immediate additional security for your van and peace of mind 24/7.

UFO<sup>2</sup> is the ideal solution for, leisure and work, van owners who need additional security when required.

# UFO+

UFO+ is a slamlock that provides even more security for your van, automatically locking itself once the door is shut; making it unlikely that the driver will forget to lock the doors.

With this lock, quality design and construction reach a new level of security, making the UFO+ the ideal choice for couriers, multi-drop delivery drivers and tradespeople, who absolutely need to

limit the chance of opportunistic theft.

UFO+, after its installation, remains fixed to the vehicle bodywork. The lock is supplied with a practical set of reversible flat keys.

# UFO<sup>3</sup>

The UFO<sup>3</sup> range is the latest generation of slamlocks, offering the highest level of security within Meroni van locks.

This range features a black Rilsan® coating for maximum weather and chemical protection.

The UFO<sup>3</sup> range offers 3 choices:

**SMART DUO:** a non key retaining dual-function lock; it can be used either as

a deadlock or slamlock, offering greater flexibility.

**COMFORT:** our top seller, a slamlock that has successfully passed the Sold Secure Security Test Standard (Gold category) and fulfills the EN12320 (Grade 6) requirements.

**EXPERT:** considered one of the highest security slamlocks in the van security industry.

# UFO Cloud

Matching **UFO<sup>3</sup>** with **IoT technology**, has brought to life **UFO Cloud**, a pioneering access control system that features four log-in levels and different permissions.

UFO Cloud allows you to open the vehicle loading area, manage and set UFO via Bluetooth, with a smartphone, using an App or Web App.

An ideal solution for either a single van

owner or a large fleet requiring associate opening permissions, sending virtual keys and setting key validity periods.

UFO Cloud works within an integrated system where multiple smart locks are managed via an App; not only controlling the access of your van loading area, but that of a house gate, front door or a locker in your office, and much more.
